SAHARA MOTORS DUBAI

The 2026 Toyota Hilux Double Cab Pickup GLS-G1 is a practical and durable truck designed for everyday work and versatile driving. It is powered by a 2.7L 2TR-FE four-cylinder petrol engine with DOHC, 16 valves, electronic fuel injection, and Dual VVT-i technology. The engine produces 164 horsepower and 25 kg-m of torque, paired with a six-speed automatic transmission for smooth gear changes. This 4x2 pickup is equipped with 215/65 R16C tyres on steel wheels with full wheel caps and a steel spare. Its fuel tank capacity and fuel economy figures were not provided in the supplied specifications. The five-seat Toyota Hilux combines dependable performance with useful equipment for work and daily travel. The model code is TGN121L-DTTSKV, and its Euro 4 emission standard supports its specified engine configuration for this model, on paved roads and light-duty routes, and demanding workdays alike.

The Toyota Hilux GLS-G1 includes exterior and convenience features for everyday use. It has a colour-keyed front bumper, a chrome steel-step rear bumper, a chrome-and-silver radiator grille, and chrome exterior door handles and mirrors. Multi-reflector halogen headlamps, front and rear fog lamps, plus an LED high-mounted stop lamp, while rear mudguards and side stripes. The pickup features green side and rear glass, a green laminated windshield with a top shade, a sliding rear window, and a J-type deck with a bedliner. Its short-pole antenna and audio system with AM/FM CD, USB, AUX, Bluetooth, and two speakers provide basic entertainment. Steel wheels, full wheel caps, and 215/65 R16C tyres complete the exterior setup.

The cabin seats five, with separate fabric front seats and a tip-up rear seat for three passengers. Driver and passenger front headrests are adjustable, while two rear headrests provide support. Comfort features include air conditioning and heating, a console box with lid and separator, a lockable cool glove box, cup holders, a digital clock, and a TFT multi-information display. The power windows include automatic down operation for the driver, and the vehicle has keyless entry, power door locks, power outer mirrors, and power-assisted tilt steering. Safety equipment includes driver, front passenger, and driver-knee airbags, ABS, EBD, brake assist, vehicle stability control, hill-start assist, trailer sway control, and a tyre pressure monitoring system. An anti-theft immobilizer and three-point front and rear seat belts with rear centre belt complete the listed safety features.
