SAHARA MOTORS DUBAI

The 2026 Toyota Tundra CrewMax SR5 TRD Off-Road combines powerful twin-turbo performance, advanced off-road technology, and a spacious 5-seater pickup design. It is powered by a 3.4-liter twin-turbo V6 engine with intercooling, producing 389 HP (290 kW), and is paired with a 10-speed Direct Shift automatic transmission for smooth and responsive performance. The selectable Sport, Eco, and Normal driving modes allow drivers to adapt to different driving conditions. With a 4WD drivetrain, 121-liter fuel tank, and fuel consumption of 13.5 L/100 km in the city, 10.6 L/100 km on the highway, and 12.2 L/100 km combined, the Tundra is built for demanding journeys. Its towing capacity of up to 5,060 kg, heavy-duty tow hitch receiver, and trailer brake controller make it suitable for hauling and towing. The full boxed ladder frame, independent front suspension, rear coil springs, and active grille shutters support its rugged design.

Inside, the Tundra CrewMax SR5 TRD Off-Road features fabric seats, heated front seats, and 8-way power-adjustable driver and passenger seats with 2-way power lumbar support for added comfort on long journeys. Dual-zone automatic climate control helps maintain a pleasant cabin temperature, while the leather-wrapped heated steering wheel and TRD leather-wrapped shift knob add a premium touch. The 8-inch Toyota Multimedia system provides convenient access to entertainment and connectivity features, including wireless Apple CarPlay, wireless Android Auto, SiriusXM audio, HD Radio, Bluetooth, Toyota Assistant, and Drive Connect. A 9-speaker audio system further enhances the listening experience. TRD-specific equipment includes a heated steering wheel, TRD front grille, 18-inch off-road alloy wheels, TRD off-road shock absorbers, locking rear differential, Multi-Terrain Select, Crawl Control, and Downhill Assist Control, helping support off-road driving.

The exterior of the 2026 Toyota Tundra CrewMax SR5 TRD Off-Road combines a bold pickup design with functional equipment. It rides on 18-inch off-road alloy wheels fitted with 265/70R18 tyres and features LED fog lamps, an active front spoiler, a header rail, and a full resin cargo bed. Safety equipment includes driver and front passenger airbags, front seat side airbags, roll-sensing front head and side curtain airbags, and driver and front passenger knee airbags. Child-protector rear door locks add another layer of protection for families. Furthermore, Electronic Brake-force Distribution (EBD), Brake Assist (BA), Vehicle Stability Control (VSC), Traction Control (TRAC), Smart Stop Technology, and Hill-Start Assist Control help support controlled driving. Toyota Safety Sense 2.5 adds advanced driver-assistance features, including the Pre-Collision System, pedestrian and oncoming-vehicle detection with braking, Lane Tracing Assist, Lane Departure Alert with Steering Assist, Automatic High Beams, Dynamic Radar Cruise Control, and Emergency Steering Assist. Intuitive Parking Assist with Auto Braking and Blind Spot Monitor with Rear Cross-Traffic Alert further support driver awareness.
