SAHARA MOTORS DUBAI

The 2026 Toyota Hilux Double Cab Pickup Adventure is a powerful combination of performance, durability, and practicality, designed for both everyday driving and off-road adventures. Powered by a 2.8-liter 1GD-FTV four-cylinder diesel engine with a 2755 cc displacement, it produces 201 HP and 51 kg-m of torque. Paired with a 6-speed automatic transmission and part-time 4WD, the Hilux delivers confident performance across different terrains. The rear differential lock with Auto Disconnect Differential (ADD), along with Downhill Assist Control and Hill Start Assist Control, further enhances its off-road capability. With seating for five and an 80-liter fuel tank, this pickup is ready for long journeys and demanding drives.

Inside, the 2026 Toyota Hilux Adventure offers a practical and comfortable cabin equipped with features designed for everyday convenience. The dark grey fabric seats feature an Adventure design, while the front seats include adjustable functions and the rear seats provide dedicated seat belts and a centre armrest. The automatic air conditioning system with rear ducts helps maintain a comfortable cabin environment for all passengers. A digital clock, tachometer, cool glove box, power windows, power door locks, and keyless entry with push start add convenience to every drive. The 8-inch display audio system with USB and Bluetooth connectivity, along with six speakers, keeps passengers connected and entertained. The Hilux also features cruise control, radar cruise control, an ECO/Power drive mode, and a multi-information TFT display.

Built for safety and adventure, the 2026 Toyota Hilux Adventure comes equipped with a comprehensive range of driver-assistance and safety features. ABS with EBD and Brake Assist work together to provide controlled braking, while Vehicle Stability Control, Hill Start Assist, Trailer Sway Control, and Downhill Assist Control provide added confidence on challenging roads. Driver, front passenger, and driver knee airbags offer additional protection, while the Tyre Pressure Monitoring System helps monitor tyre conditions. Visibility and parking are enhanced with a back-view camera with PVM, a digital rear-view mirror, and front and rear parking sensors. LED headlamps with auto levelling, LED front fog lamps, a rear fog lamp, and a high-mount LED stop lamp improve visibility. With its 310 mm ground clearance, 18-inch alloy wheels with 265/60 R18 all-terrain tyres, 5-foot deck, and Adventure package, the Hilux is built to handle both demanding work and exciting journeys.
