8 SPEAKERS  
REAR SEAT HEATER DUCTS  
DUAL ZONE AUTOMATIC CLIMATE CONTROL  
BLACK PAINTED ROOF RAILS  
POWER SLIDE / TILT MOONROOF

The 2023 Toyota 4Runner is one of the last mid-size SUVs that still lives up to its reputation for toughness despite being the segment's older gentleman. It may have retained most of its original appearance, but the boxed fenders and high beltline still give it a rugged appearance. This image is mirrored by its robust ladder frame and powerful V-6 engine, which are wonderful for tackling trails, especially with the line-up's different off-road-ready variants, but less great for refinement and fuel efficiency. Although the 4Runner's tall and boxy design makes the cabin and cargo area large, the interior materials appear and feel low-quality. With a variety of standard driver aids, like as adaptive cruise control and lane-keeping assist, Toyota makes up for the popular off-advanced roader's age.

# GALLERY - EXTERIOR

# GALLERY - INTERIOR

The Toyota 4Runner mid-size SUV effortlessly combines a posh interior with tough 4x4 capability. Ready to fuel your upcoming journey. The 4Runner is a true off-road sport utility vehicle that combines strong body-on-frame building with a commanding external design that includes a power moonroof, alloy wheels, roof rails, running boards, LED headlamps (low beam only), LED fog lamps, and more. Visit our website to now more about it.
