# SAHARA MOTORS GROUP

Toyota Hilux GR Sport Pickup known for its durability, reliability, and off-road capabilities. The Hilux is available in various configurations and is widely used for both personal and commercial purposes around the world. On the other hand, GR (Gazoo Racing) is Toyota's performance division, which focuses on developing high-performance vehicles and motorsport activities. GR-branded pickups often feature enhanced performance, handling, and styling, targeting enthusiasts and those looking for a more spirited driving experience.

The Hilux GR Sport is a double cab vehicle that combines an even more aggressive version of the current model's appearance with best-in-class towing (3,500kg) and payload (1,000kg). No matter where the spirit of adventure leads it, it stands out from the throng. Regardless of the weather or road conditions, this results in a ride that inspires confidence. Thanks to the wider track and major handling characteristic upgrades, such as a lower roll angle and more precise steering response, this Hilux drives better than ever, both on and off road. In addition to suspension and brake revisions, there is a reduction in noise and vibration. The engine is still the dependable, potent 2.8-liter unit that debuted with the range in 2020. With 500Nm and 201bhp/105kW, this is driven by a six-speed automatic transmission.

With its red coil springs, colored rear and front dampers, and black overfenders, the stylistic upgrades offer the Hilux an even more commanding and dynamic look. The new 17-inch black alloy wheels contrast sharply with the red brake callipers, adding to the striking visuals. Their lightweight and aerodynamically efficient design further enhances the vehicle's performance. The cabin's chic black monotone concept with striking red accents balances the design's strength. The sports seats have silver stitching and perforations and are covered in a mixture of black synthetic suede and leather. When driving in more difficult conditions, their design and finish offer comfort, support, and good body-gripping performance even under severe lateral forces.
