SAHARA MOTORS GROUP

The 2026 model Jeep Wrangler 4-Door Rubicon in 2.0L 4WD automatic trim is built for drivers who want true off-road performance with the everyday practicality of a four-door SUV. As a Rubicon, it's engineered with trail-ready components and enhanced capability so you can tackle rough paths, loose terrain, and steep grades with more confidence and control. Powered by the 2.0L engine and paired with an automatic transmission, it's designed to deliver responsive power while keeping driving smooth in both city traffic and at the trailhead. With full 4WD traction and Wrangler's signature go-anywhere design, this model blends tough off-road durability, capable handling, and versatile cabin space—making it a strong choice for adventure seekers who want one vehicle that can do the daily commute as well as the weekend off-road escape.

The 2026 Jeep Wrangler 4-Door Rubicon is powered by a 2.0L 14 DOHC DI Turbo engine with ESS, designed to provide strong, efficient performance for both daily driving and off-road adventures. It's matched with an 8-speed automatic transmission (850RE) to help deliver smooth acceleration and confident control across changing terrain. With full Four Wheel Drive (4WD / 4X4) capability, this Wrangler is built to help you maintain traction and stability when roads turn rugged or conditions get unpredictable. The vehicle also features all-aluminum wheels, including 17x8.0 machined wheels with black pockets, giving it a bold, trail-capable look. For added reliability during longer trips or challenging routes, it includes a full-size spare tire, so you're better prepared for whatever the road—or trail—throws your way.

The 2026 Jeep Wrangler 4-Door Rubicon features premium comfort and convenience with Nappa leather seats in a black interior, offering low-back bucket seating, reclining front seats, and a rear 60/40 folding seat for flexible cargo and passenger space. It's designed for off-road readiness with a hard seat rack, sport bar, rock protection sill rails, and off-road plus mode support, along with hydraulic assist brake booster, traction and stability control, and hill start assist for confident handling on uneven terrain. For driver convenience, the cabin includes a heated steering wheel and heated front seats, a remote start system, pushbutton start, 2-door passive entry with front door locks, remote keyless entry, and a 7.0 TFT color cluster display plus a 12.3-inch touchscreen with off-road information pages, Apple CarPlay, Google Android Auto, and built-in GPS navigation. Safety and driver-assist features include advanced brake assist, adaptive cruise control with stop, full-speed forward collision warning plus, supplemental airbags, security alarm, and a rear seat reminder alert. On the technology and performance side, it includes TIP start, electronic-speed control, and speed-sensitive power locks, while also offering advanced multimedia with digital audio broadcasting.
