SAHARA MOTORS DUBAI

The 2025 Toyota Land Cruiser 78 Hardtop 2.8L Diesel is built for drivers who value durability, capability, and dependable performance. Powered by a 2.8L 1GD-FTV turbo diesel four-cylinder engine delivering 201 HP and 51 KGM of torque, this 4WD SUV combines rugged strength with practical versatility. Its tough exterior features a material-colour grille, halogen headlamps, painted front bumper with chrome molding, black rear bumper, front and rear mudguards, steel side steps, side turn signals, sliding rear quarter glass, and a snorkel. The 225/95R16 tubeless tyres, free wheel hubs, rear spare wheel carrier, towing hooks, and green laminated windshield further reinforce its durable character for demanding routes and long-distance journeys across challenging environments worldwide, while maintaining dependable performance every day.

Inside, the Land Cruiser 78 Hardtop offers a practical eight-seat cabin designed for utility, comfort, and everyday usability. The interior features fabric seats, a front bench and second-row parallel seating arrangement, rubber front floor mats, a keyed glove box, day/night inner mirror, manual antenna, 1DIN audio system with one speaker, clock, cigarette lighter and ashtray. The four-spoke urethane steering wheel works with power steering, tilt and telescopic adjustment for easier control. Air conditioning and heating maintain cabin comfort, while the rear window defogger, meter illumination control, low-speedometer, and key-reminder warning add convenience for passengers and driver alike with a layout suited to long journeys and daily use.

The 2025 Land Cruiser 78 Hardtop delivers confidence through a comprehensive range of safety and control systems. Equipped with ABS, VSC, Brake Assist, EBD, Hill-start Assist Control, Active Traction Control, Downhill Assist Control, and tire pressure monitoring, it provides stable handling across demanding driving conditions. Driver and front passenger airbags, front and rear seat belts, rear fog lamp, and towing hooks enhance protection and practicality. The 6-speed automatic transmission works with coil front and leaf rear suspension, while ventilated disc front brakes and rear drum brakes support reliable stopping performance. The 180-liter dual fuel tanks provide extended driving range. These features make it dependable for work, travel, and remote adventures worldwide.
